

publish at the time because of prevailing conditions, I will so state in my letter. Otherwise you may feel free to publish it in your paper or any other that might be interested and desirous of reproducing it.

This program does not exclude anyone.. It is non-political, non-sectarian and its sole purpose is to promote friendship through understanding. We in our world are today striving towards space travel and we will succeed within the next few years, I am sure. So it is wisdom for us to be prepared with an understanding of what to expect as we reach other planets, as their people are now coming our way. At the same time, as we study ourselves and learn to understand and have compassion for our fellow beings, we automatically prepare the way for open and safe landings of our space visitors. Then we can enjoy the privilege of entertaining them, as we now enjoy the privilege of entertaining one another of our friends in our own nations and those visitors from other nations.

May I take this opportunity to wish you and your fellow members of your group the greatest of happiness with ever-increasing understanding and fellowship.

Most sincerely,

George Adamski
