

Again, we have received "messages" from around the world purportedly from space people denouncing smoking, drinking, meat eating, etc. In excess I admit that all of these can be harmful to the body, but so can drinking too much water, or excessive dieting. Any unbalanced condition or act brings about its own inharmonious state. The space brothers have never denounced any of the above to me, if not over done. But we can go one step farther and say that even our human emotions can be harmful and can kill when allowed to rise out of control.

We have also received reports that the space visitors support one or another of Earth's religions above all others. This is not true. They recognize the good in each religion, but as with everything, in our world and theirs, they find none perfect because the law of the Cosmos is eternal growth and progression.

Mikalek, in Chile, I am told is selling visas to sincere people, promising them passage to Venus. He also claims to have been appointed supreme dictator for the world by the space travelers who, he says, are going to land en masse and take over the rule of our world. I have never heard anything of this kind. It is totally against all of their way of life. They have no ruler on their planets, why should they want to appoint one over ours? If his contacts were real and they had such plans they would not be one bit better than we are today. Such an act would only mean a change of dictators and authority over Earth's people. Our neighbors on other planets have learned a happier way of living and hope that we will learn too. Yet they know that such cannot be forced upon anyone. Through the years they have done their best to help us in many ways, only to be ignored by those who could help and shot at by planes of some governments.

Some of you may remember Lee Childers who in 1964 was telling all who would listen to him or his tapes about his meetings with the "space people" including "their" instructions to start a new religion. Now this same Lee Childers is traveling through our country under the name of "Prince Neason" from "Planet Tythan" which is 8½ light years from our Earth. With him is his "wife," Princess "Regonna" supposedly from the same planet. In 1964 both of these people were married and had families. One wonders what has happened during the past years to make such changes and what has happened to their respective families. An interesting point is that they both wear crosses (the symbol of oppression and death) around their necks and proudly proclaim that "Jesus is our leader." True space people would do neither, nor would they proclaim themselves in any manner of rank.

First of all they have learned the joy and freedom of the Cosmos, why would they wish to bind themselves to any symbol of destruction? Second: Jesus was the Earthly name given to one who so knew the reality of his being and lived accordingly that he has been proclaimed the Christ. Those who know themselves to be children of the Creator do not subject themselves to any personality, whether it be of our Earth or another world. Instead they live according to the laws of the Creator, respecting all on an equal basis as brothers and sisters, children of the one Father.
