

I am not saying that the Russians have not shot at them at one time or another. That I do not know. But one thing I do know, space craft have been appearing over that country and landing, the same as they have over the rest of the world. And I am inclined to believe from their successes so far that the Russians must have given the know-how through cooperation with the interplanetary travelers more than some of the rest of us, especially since ~~Chalov~~ stated that they are using a propulsion so far unknown to the rest of the world. During my world trip I was told by more than one scientist whom I met, that they cannot take credit for recent developments to themselves...that they have been "helped". So since one group of scientists has been helped, there is no question in my mind but that others have also been helped.

No information of this kind has ever been given to the people by the psychic or through mediumistic channels. Yet already much of it has been proven. Thus any thinking person can see why those giving true facts have been so bitterly fought by the opposition, while those whose "messages" only serve to confuse the people are given full freedom and much publicity. For ignorance or otherwise, they are in reality working for the opposition whose power lies in keeping the people in ignorance. Even when such claimants work to establish new cults they are further dividing the people and in this way too working for the opposition. That is why, while I find no fault with the people themselves, I cannot and will never support their efforts as long as they continue as they are working today. So long as I continue meeting and working with the space visitors, my only interest, as is theirs, will be in unifying the people of the world in relationship to the universe of which we are all a part.

Our best wishes to each and every one of you,

GA:lm

*George Adamski*  
Sincerely,  
George Adamski

Dear Mr. Kubota:

It was good to hear from you again after so long a time. Mr. Adamski read with great interest your recent letters and has desired to answer them personally. However, he has been so busy working on his book which he hopes to complete in time for publication in 1960, and has had so many interruptions of various kinds, that he has not yet dictated his letter to you. However, you will probably find some of the answers in this letter.

As for definite dates for changes to take place on Earth, I have never heard GA give any other than to say during the years 1959 and 1960 many changes could be expected. Even with their far superior instruments, the space people have been unable to give any specific dates for Earth's happenings, either manmade or natural. They note indications and calculate from these, but as you well know, many unexpected events can arise to change a pattern. At the same time, I would say that our weather throughout the world already indicates something unusual is taking place in and on our planet. Japan has suffered terribly and our thoughts here gone out to all Japanese people in their suffering. Earthquakes, hurricanes, floods, tornadoes, typhoons, etc. have hit where they previously have been known only as reports from other places. Our scientists are doing their utmost to predict when and where the next such event will take place so as to warn the people, but they are not always successful, and often the people will not heed the warning.

We have several letters from Japan which we will forward to you for answer as quickly as possible. Much as we would like to answer every letter personally, this is impossible, so we do appreciate the cooperation of our co-workers. Please explain to the writers, will you

with sincere good wishes to you and your co-workers always,  
Very truly yours,  
Mr. Adamski
