Dear Mr. Kubota:

Sorry to hear of your group, but I must say that he cannot be a friend of yours to do a thing like that to you; and I definitely know that he is not a contactee. That has all been made up in his mind, for the Brothers told me so. X  
As far as "r. Wickenson is concerned regarding Mr. A that also is false, if there was a way of my coming to Japan I would certainly do so, but you know how finances are always the trouble.

Yes, I have sold the property in order to keep going, I might be moving to another state or possibly to Mexico, but you can always contact me through C. A. Honey, 1231 E Belmont Ave, Anaheim, California; as he will represent me in the United States. He will also put out a newsletter after the first of the year on Scientific and Philosophical matter to which I will make a contribution regularly.

We are living in a very crucial days and sincerity of purpose and not personal gratifications is important to carry this work through. You see I have the same trouble, my secretary for 15 years, Lucy McGinnis has not been with me for the past four months and whether she will come back or not, I cannot say. The next thirty days will give me that answer. She too went off the beam so you see the best of your friends sometimes are confused by the confused world we are living in. So brace up, the same as we all must do. My thoughts are with you and somehow we will pull this through.

My new book "Flying Saucers Farewell" is just coming on the market, it should straighten out some of the confusion, so thank you and may God bless you and all of your helpers.

Yours truly,
