

I was on a ship and they brought my former wife to me as a young girl. They mature much faster there than here. There was a resemblance to my former wife and I had a strong feeling it was she, but my mind was still questioning. Finally she spoke of things that had happened in our first year of life together, that I had totally forgotten. So she could not have been reading my mind; and she also told me a number of other things which were convincing and true. She did not wish to be reminded of anything of an unpleasant or personal experiences of this world. And she did not wish any pictures taken of her as she did not want minds of this world to think of her as they had known her in this world, for she said that would interfere with the new teachings and study that she was now undertaking and create a confusion in her mind during the study. She told me that, that part which was personal had been experienced in earth life and has no value in the future and the less she thought of it, the more progress she would make. They can receive our thoughts quite distinctly if we think of them and that would interfere with their daily activities, dividing the attention between the past and the present. She told me at the time what was about to happen in the groups themselves, especially between my secretary and myself. That did take place. I was taken to her parents, a very nice couple and she was their first child. I visited with them for 5 hours.

This was quite revealing for teachings to date are either that we are going to lie in the ground until Gabriel blows his horn, or we are going to float around in space in the so-called spirit world or come back to this earth as a vegetable or animal, which I could never swallow. But this experience brought out one outstanding thing in the Christian teachings, and that is when Jesus said to the thief on the cross "This very day you shall be in Paradise with me." He did say there would be an intrum period, like they teach today. For he said the thief would be re-born in a new place instantly. This experience with my former wife was the proof of His statement. It is quite true that she will not be my wife again when I make my change.

Which again bears out, Jesus' statement to the 7 brothers, that there are no marriages, not the kind known on earth, in heaven. These planets are in heaven, even though some may be low like we are but they are all in the sea of space and are given life and support by space itself. Space can be called heaven since it does not respect one form above another; and is a parent to all forms alike, since all forms come into manifestation out of the invisible states which can be called the source of origin, or the primal cause.
